(54) INTEGRATED CIRCUIT WITH BUILT-IN PROCESSOR AND INTERNAL BUS OBSERVING  
 METHOD

(57)Abstract:

PROBLEM TO BE SOLVED: To permit the observation of an internal bus at the time of real operation providing all operating functions and to permit suitable function verification and the operation analysis of a processor.  
 SOLUTION: An LSI 1 with built-in CPU as a circuit is provided with a CPU core 2, an internal CPU bus 9 connected to the CPU core 2 and an external pin 17 for external memory to access an external memory 14. In this case, a bus selector 11 is provided for outputting the signal of the internal CPU bus 9 to the external pin 17 for external memory access while the operation of access to the external memory 14 is not performed.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's  
decision of rejection]  
[Date of extinction of right]
